SUMMARY

A DevOps Engineer with experience in building scalable, secure, and highly available infrastructure. Skilled in automating deployments, optimizing system performance, strengthening security, and resolving production challenges. Strong team player committed to delivering reliable solutions and driving operational excellence.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, VPC, IAM, S3, CloudFront, ECR, SSM Parameter Store), Terraform

Containers & Orchestration: Docker, Kubernetes, Helm

CI/CD & Version Control: GitHub Actions, Jenkins, ArgoCD, Git

Monitoring & Systems: Prometheus, Grafana, Linux, NGINX

Databases & Programming: PostgreSQL, Redis, Go, C#

AI-Assisted DevOps: AI-powered scripting, automation, and troubleshooting workflows

PROFESSIONAL EXPERIENCE

NexTechnologies Labs Private Limited

Surat, India

DevOps Engineer

Sep 2024 – May 2026

- Architected and managed AWS infrastructure including EC2, IAM, VPC, S3, CloudFront, and ECR for scalable production environments.
- Designed Kubernetes architecture using Deployments, Pods, Services, ConfigMaps, and ClusterIP networking for containerized applications.
- Reduced Kubernetes pod memory usage by approximately 25% (80Mi to 60Mi) through resource optimization.
- Automated deployments using Helm charts for Prometheus, Grafana, Kafka, and multiple platform services.
- Implemented Kubernetes RBAC policies to strengthen cluster security and access management.
- Configured NGINX as a reverse proxy with SSL termination and secure traffic routing.
- Delivered static content at scale using Amazon S3 and CloudFront integrated with Strapi, improving availability and load performance.
- Deployed a production portfolio application on AWS EC2, configuring NGINX reverse proxy, DNS routing, and process management with PM2.
- Built Grafana dashboards and monitored production environments using Prometheus while utilizing AI-assisted troubleshooting workflows.
- Developed Windows desktop cybersecurity applications using C# and WPF, including Fusion VPN and Data Privacy Protection.
- Created production-ready MSI installers using Advanced Installer.
- Resolved production incidents by collaborating with clients across development, testing, deployment, and support teams.

PROJECTS

AstraLink — Kubernetes-Based Microservices Platform

- Deployed microservices on Kubernetes using Helm for scalable and repeatable deployments.
- Managed application configuration securely using AWS SSM Parameter Store.
- Integrated Docker, Kubernetes, and AWS ECR into the deployment workflow.
- Used AI-assisted tools to speed up Helm chart development and troubleshoot configuration issues faster.
- Standardized Kubernetes manifests across services to improve deployment consistency and reduce setup time.

Fusion Data Secure — Enterprise Cybersecurity Platform

- Developed enterprise Windows desktop cybersecurity applications for VPN connectivity and data protection.
- Built production-ready MSI installers using Advanced Installer.
- Applied AI-assisted tools to accelerate debugging and reduce installer testing time.
- Diagnosed and resolved critical production issues, improving application stability and user experience.

EDUCATION

Master of Science (Information Technology)

2019 – 2024

Veer Narmad South Gujarat University
