

Dhruv Patel

Software Engineer & DevOps

Email: dhruvmpatel170301@gmail.com Phone: +91-6353446146 Website: dhruvpatel.space

SUMMARY

Software & DevOps Engineer specializing in scalable cloud infrastructure, CI/CD automation, and Kubernetes-based deployments. Improved deployment efficiency by 40%, reduced manual deployment effort by 60%, and strengthened system reliability through automated monitoring and alerting. Experienced in troubleshooting production issues and driving infrastructure automation and operational excellence.

TECHNICAL SKILLS

Cloud & Infrastructure: Aws, Azur, Terraform

Containers & Orchestration: Docker, Kubernetes, Helm

CI/CD & Version Control: GitHub Actions, Jenkins, Git

Monitoring & Systems: Prometheus, Grafana, Linux, NGINX

Databases & Programming: PostgreSQL, Redis, Go, C# , Python

AI-Assisted DevOps: AI-powered scripting, automation, and troubleshooting workflows

PROFESSIONAL EXPERIENCE

NexTechnologies Labs Private Limited

Surat, India

DevOps Engineer

Sep 2024 – May 2026

- Architected and managed scalable production infrastructure on **AWS**, configuring **EC2, IAM, VPC, S3, CloudFront, and EKS**.
- Designed **Kubernetes** architectures for containerized applications, utilizing **Deployments, Pods, Services, ConfigMaps, and ClusterIP** networking.
- Optimized **Kubernetes** resource allocation, successfully reducing pod memory usage by **25% (80Mi to 60Mi)**.
- Automated the deployment of **Prometheus, Grafana, Kafka**, and various platform services using **Helm** charts.
- Strengthened cluster security and centralized access management by implementing strict **Kubernetes RBAC** policies.
- Configured **NGINX** as a reverse proxy to handle secure traffic routing and SSL termination.
- Improved application availability and load performance by delivering static content at scale via **Amazon S3, CloudFront, and Strapi**.
- Deployed a production portfolio application on **AWS EC2**, managing DNS routing, **NGINX** reverse proxies, and **PM2** process management.
- Monitored production environments with **Prometheus** and custom **Grafana** dashboards, leveraging **AI-assisted workflows** to accelerate troubleshooting.
- Developed enterprise **Windows desktop** cybersecurity applications (Fusion VPN, Data Privacy Protection) using **C#** and **WPF**.
- Packaged and delivered production-ready **MSI installers** utilizing **Advanced Installer**.
- Resolved critical production incidents through active collaboration with clients and cross-functional development, testing, and support teams.

PROJECTS

AstraLink

- Standardized scalable microservice deployments by integrating **Docker, Kubernetes, and AWS ECR** into the workflow.
- Accelerated setup times and development using **Helm** for repeatable manifests and **AI-assisted tools** for rapid troubleshooting.
- Secured sensitive application configurations using **AWS SSM Parameter Store**.

Fusion Data Secure – Enterprise Cybersecurity Platform

- Developed enterprise **Windows desktop** cybersecurity applications in **C#** for **VPN** connectivity and robust data protection.
- Packaged production-ready **MSI installers** using **Advanced Installer**.
- Improved application stability and reduced installer testing time by applying **AI-assisted tools** for advanced debugging and issue resolution.

EDUCATION

Master of Science (Information Technology)

2019 – 2024

Veer Narmad South Gujarat University
